

The **dual height rack** enables you to cook on two levels simultaneously. It can be turned either way to create a low or high rack onto which you can place the **steam dish**.

Operating Instructions:

1. Place food at the center of the bowl on the dual height rack keeping the food approximately 1 - 1 1/4 inches from the glass wall to allow maximum air circulation.
2. Insert the plug firm into the outlet
3. Set the thermostat and timer as required. Set the oven to the desired temperature and time.
4. Your Convection Oven will quickly heat up to the set temperature and maintain this temperature until the selected time expires. The fan and the timer will then switch "off"

Note: The thermostat accurately controls the temperature by switching the element "off. " You will notice the temperature light blinking "on" and "off". The timer will "off" after the preset time period has passed and a bell will sound momentarily to alert you that the cooking time is over.

11 Why do we have to put the food approximately 1 to 1 1/4 inches from the glass?

A boy named Oman was walking through the mountains near his home. Oman walked higher and higher into the mountains, farther and farther from home. It was beginning to get dark before Oman realized he was lost.

Suddenly, Oman heard the noises that sounded like people playing drums and dancing. The sounds seem to be getting louder, so he continued walking. When he reached the spot where the sound seemed to be coming from, the drumming and the dancing noises stopped. The spot was barren except for some grasses and weeds.

It was already very dark, causing Oman to stumble over a rock and fall down. When he looked up, Oman saw a little man looking down at him from some huge rocks. The man was about two feet tall, and had long dark hair.

The little man shouted angrily, "What are you doing here?"

"I'm lost," Oman answered.

"Oh! no." the boy replied. "I was walking in the mountains. When it got dark, I couldn't find my way home."

"I will lead you home," said the little man, "but you must promise never to tell anyone about any noises you heard." Oman eagerly promised not to tell what he'd seen and heard; he was just anxious to get home!

So the strange little man led Oman safely down the mountains to his home. True to his words, Oman never told anyone about the little man and what he'd seen and heard in the mountains.

25 Which sentence describes how Oman probably felt about the little man at the end of the story? Oman _____

- ☐ was amused by the strange and funny man.
- ☐ felt sorry for the little man and wanted to help him.
- ☐ respected the little man and was grateful for his help.
- ☐ was afraid of the angry little man and what he might do.
