## Revised 2010

## by the Learning Resource Management and Development System (LRMDS), DepEd - Division of Negros Occidental under the Strengthening the Implementation of Basic Education in Selected Provinces in the Visayas (STRIVE).

Section 9 of Presidential Decree No. 49 provides:
"No copyright shall subsist in any work of the Government of the Republic of the Philippines. However, prior approval of the government agency or office wherein the work is created shall be necessary for exploitation of such work for profit."

This material was originally produced by the Bureau of Elementary Education of the Department of Education, Republic of the Philippines.

## ADDITION OF MIXED DECIMALS WITHOUT OR WITH REGROUPING

Objective: Add mixed decimals with or without regrouping.

## Review

Do these exercises in your notebook.
A. Find the sum by adding horizontally and vertically.

| 0.3 | 0.36 | 0.8 |  |
| :---: | :---: | :---: | :---: |
| 0.9 | 0.7 | 0.22 |  |
| 0.11 | 0.4 | 0.5 |  |
|  |  |  |  |

B. Answer the following:
a. 0.89 more than 0.8 is $\qquad$
b. 0.06 added to 0.79 gives $\qquad$
c. Increased 0.47 by 0.07 , the answer is $\qquad$
d. 0.19 and 0.62 are put together, the result is $\qquad$
e. 0.63 more than the sum of 0.06 and 0.85 is $\qquad$

Did you align the decimal point of each number before adding them?

Check your answers using the answer key. If you have a score of 10 12, you may proceed to this module. If you get 9 correct answers or below, go back to your past lessons.

Mother wants to prepare "pinakbet" for lunch. Can you help her get or buy the vegetables for the menu? Are you helpful to your mother every time she needs help? In what way?
A. Observe closely the prices of vegetables in the vegetable stand in the market.

| Eggplant | F $60.00 / \mathrm{kilo}$ |
| :--- | :--- |
| squash | F $50.50 /$ kilo |
| sayote | F $40.50 /$ kilo |
| string beans | F $55.00 /$ kilo |
| carrots | F $62.50 /$ kilo |
| kangkong | P $22.00 /$ kilo |

1. If mother buys all the vegetables listed in the vegetable stand, how much money will she spend? $\boldsymbol{P}_{290.50}$
2. What operation will you use to know the entire cost of the vegetables? Addition
B. Mother has the following amount of money in her wallet:

3. How much money does she have in all? How can you solve the problem accurately? List down in column the amount of money according to denominations.
4. What operation will you use? Addition
5. Let's do the calculations.

$$
\begin{array}{rr}
P & 100.00 \\
P & 100.00 \\
P & 100.00 \\
P & 50.00 \\
P & 20.00 \\
P & 10.00 \\
P & 1.00 \\
P & 0.25 \\
+ & P
\end{array}
$$

$$
\text { P } 20.00 \quad \text { The total amount of money in mother's }
$$

C. In mother's menu, she listed the exact weight of vegetables to be used. What are these?

Vegetable<br>Okra<br>Eggplant<br>Squash<br>String Beans<br>Sayote<br>Kangkong

## Weight

1.25 kg .
1.8 kg .
1.20 kg .
1.50 kg .
1.75 kg .
1.25 kg .

1. What process will you use to know the exact weight of vegetables to be used by mother? Addition
2. What is the exact weight? 8.75 kg

## Analysis

3. How did you write the given numbers? Written in columns
4. Why did you write them in column? So we can add the digits according to place value
5. What separates the whole numbers and decimal numbers? decimal point
6. What process is to be used? Addition
7. What do we call these numbers? mixed decimals

Add the following:
a. 1.6
b. 5.92
c. 8.55
d. 7.03
e. P1.85
$+3.7$
$+0.16$
$+2.05$
$+2.61+\mathrm{P} 1.35$
f. $15.06+3.2+8.95=$
g. $7.16+9.20=$
h. $P 16.50+\mathcal{P 9 . 2 5 =}$
i. $P 4.65+\mathcal{P} 2.15+\mathcal{P} 1.55=$
j. $P 9.55+P 8.15+P 7.90=$

In adding mixed decimals, follow these steps:

- Write the numbers or addends in column, aligning the decimal points.
- Add as in whole number.
- Place the decimal point in your answer exactly below the decimal points of the addends.

## On Your Own

A. Add the following:
a. 7.9
b. $\mp 18.03$
c. $\quad 5.9$
d. 52.61
e. 8.25
$+12.03$

$+12.09$
$+15.7$
$+6.9$
f. 7.95
$+12.02$
g. 21.81
h. 12.03
i. $P 0.95$
$+5.6$
$+2.60$
j. $P 6.25+\mathcal{P} 12.65=$
k. $15.06+3.2+8.95=$
I. $9.52+8.06+7.9=$

Check your work with the key to correction.
If you scored 10-12, you may proceed to the next module.
If you scored $6-9$, review the items you missed.
If you scored $0-5$, repeat the whole process.

Just like your previous lessons, you did your task correctly. Don't be content of your achievement. Strive to make your work perfect and at your normal pace.
